## WORK EXPERIENCE

### rtCamp

- Developed npm package to create a node CLI-script similar to create-react-app to generate a desktop app from the website by just providing site URL to script using node, bash scripts and nativefier
- Developed Gutenberg block using react with wordpress as a backend to develop custom slider which can be used in different websites to show media elements
- Created a new feature in a gutenberg block for one of the clients to generate two different layout variations for the same gutenberg block using react,html and css
- Developed wordpress plugin to create a library for storing information about movies similar to Imdb site by using wordpress,php,mysql,javascript,html and css

## EDUCATION

07/2017 – 06/2021

### BE Electronics & Telecommunication

Pune

Pune Institute Of Computer Technology  
CGPA:7.97/10

## PROJECTS

### User Authentication

- Developed user authentication using JSON web token and local storage API
- Developed social OAuth logins to authenticate users without email and password
- Created protected routes using node.js and used Postgres db to store user credentials
- Tech stack: React.js, Node.js, Postgres

### Yelp Clone

- Developed a full-stack web application to show users data about different hotels and their reviews
- Users can add their reviews for the specific restaurant and new hotels to the application
- For managing state in the application used context API
- Tech Stack: React, Node.js, Postgres

### Weather Application

- Developed responsive weather app using openweathermap API
- Used geolocation API to get the user's current location to display weather data based on his current location
- Created search autocomplete feature in the search bar when users search location-specific weather data
- Created graph view using chart.js to show hourly weather report
- <https://weatherwebap.netlify.app/>

### Job Finder Application

- Created web application to discover jobs and apply to it
- Used css-in-js and GitHub jobs API to create a fully responsive site with flexbox and grid.
- Tech Stack:React,CSS Grid,flexbox

## SKILLS

Node.js
